

## XADO RED CLEANER (Diesel)

### Product Description:

**XADO REDCLEANER** is a high-performance fuel system cleaner designed to remove deposits from injectors, combustion chambers, and fuel lines. Its advanced formula ensures optimal fuel atomization, improved combustion, and prolonged engine life.

### Key Components and Benefits:

- **Cetane BOOST** — a modern cetane-increasing additive for complete fuel combustion that protects the particulate filter.
- **PURE BURN (2xPEA & PIBSI X-BLEND)** — a powerful detergent complex: 2xPEA based on polyetheramine and PIBSI X-BLEND based on polyisobutylene succinimides, which removes soot and deposits from the fuel system and injectors and provides a decarbonization effect.
- **REVITALIZANT** protects fuel system parts from the ongoing wear on metal-to-metal friction surfaces.

**Application:** Add the product to the fuel tank before refueling. For Diesel engines only!

**Notes:** Dosage: 250 ml of the product per 40–60 liters of diesel.

**Composition:** Multifunctional additives, hydrocarbons, REVITALIZANT.

### Why Use XADO REDCLEANER?

Modern fuel systems, especially those with direct injection, require high-quality fuel and regular maintenance to prevent deposit build-up. REDCLEANER is tailored for use with all fuel types, including biodiesel

### Usage Recommendations:

- Ideal for preventive maintenance of fuel systems, especially when using alternative or low-quality fuels.
- Use alongside XADO REDANTICARBON for comprehensive engine cleaning. REDCLEANER ensures a clean fuel system, while REDANTICARBON targets piston and ring deposits.

### Packaging:

250 ml canister, XA 4105
