

XADO redCLEANER

Product description:

XADO REDCLEANER is a high-performance fuel system cleaner designed to remove deposits from injectors, combustion chambers, and fuel lines. Its advanced formula ensures optimal fuel atomization, improved combustion, and prolonged engine life.

Key Components and Benefits:

+2X PEA (Polyetheramine)

Effectively breaks down and removes lacquer-like deposits, ensuring a cleaner combustion chamber, piston crown, and exhaust valves.

+PIBA EXTRA BLEND

Provides powerful cleaning action for injectors, improving spray patterns and overall engine efficiency.

+PrevS (Prevent Sticking)

Prevents valve sticking during the cleaning process, ensuring smooth engine operation.

+Aquastop

Eliminates moisture from the fuel system, enhancing corrosion resistance.

+Revitalizant

Restores metal components in the fuel system, creating a durable protective layer on friction surfaces.

Application:

Add the product to the fuel tank before refueling. For gasoline engines only!

Dosage: 250 ml of the product per 30–60 liters of gasoline.

Composition: Multifunctional additives, hydrocarbons, REVITALIZANT.

Why Use XADO REDFLUSH?

Modern fuel systems, especially those with direct injection, require high-quality fuel and regular maintenance to prevent deposit build-up. REDCLEANER is tailored for use with all

fuel types, including ethanol-rich blends like E10 and E85, ensuring compatibility and superior performance.

Usage Recommendations:

Ideal for preventive maintenance of fuel systems, especially when using alternative or low-quality fuels.

Use alongside XADO REDANTICARBON for comprehensive engine cleaning. REDCLEANER ensures a clean fuel system, while REDANTICARBON targets piston and ring deposits.

Packaging:

250 ml canister, article number **XA 41024**
